Introduction

Among those who teach or learn the English language its prepositions have earned a reputation for difficulty if not downright unpredictability. The trouble lies in the great number of meanings each of the common prepositions carries. This is what makes organization of material on the prepositions essential. This book is an attempt to organize vocabulary round the teaching of the principal meanings of six of the prepositions. To illustrate the variety of meanings, only a few of the semantic varieties of *ON* may be seen in:

There's a newspaper *ON the floor*.

There's a bracelet *ON her wrist*.

It happened *ON Wednesday*.

The house is *ON fire*.

He did it *ON purpose*.

He got it *ON the sly*.

Scope and arrangement of the material

Demonstrable and non-demonstrable uses

The first point to notice is that *ON the floor* and *ON her wrist*, although they exemplify different meanings of *ON*, are both demonstrable in class: the teacher can easily and rapidly produce classroom situations in which these phrases can be used and practised in visual situational contexts. The first units in each preposition use the vocabulary of the classroom therefore.

It is often possible to relate the more difficult, abstract or non-demonstrable, uses to one or other of the simpler, demonstrable uses; to lead, for example, from the demonstrable *ON* (= attached to) as in *ON a string*

rope
thread
etc.

to *ON a stalk* etc., and from that to *ON a list* etc., and finally to *ON the staff* etc.

The material in this book is so arranged that such relations are established or are available in usable form in class.

Arrangement of the material

i. From demonstrable to abstract

Each preposition is dealt with separately, and within the section devoted to one preposition the demonstrable and physical uses are presented first, followed by uses with abstract nouns and uses which for other reasons are not demonstrable.

ii. One semantic variety at a time

The sections are divided into numbered subsections each presenting one single meaning of the preposition with its associated nouns.

iii. Complete sentences – incidental benefits

There is no need here to go into the arguments for the presentation and practice of utterances in the form of complete sentences. So far as is possible each prepositional phrase is presented as part of a very simple short sentence and is thus used, without false stress, in the normal stress-tone pattern of a complete utterance. Moreover the additions required to make the sentence have been chosen to provide incidental practice and reinforcement in such features as:

a the use of the articles – the fact, for instance, that *AT*, because of its principal meanings, has an affinity for *the* rather than *a* is fully exploited;

b phonemic differences –

in stressed syllables, e.g.

It POURS at dusk.

It PURRS at twilight.

They CHOKED at moments.

They JOKED at odd moments.

in unstressed verb forms, e.g.

They ARE sailing at high tide.

They WERE sailing at low tide.

in unstressed structural words, e.g.

He's in THE field.

He's in THEIR field.

c word order with the special finites, etc.

This practice is augmented in the suggested exercises and drills, and the teacher can readily devise additional exercises as required.

The ease with which changes in tense or in the use of the articles can

be made means that much of the material is of special value with students who require remedial work in these areas of the language.

Associated vocabulary

The nouns for use with the prepositions in the formation of prepositional phrases have been chosen with care.

i. Demonstrable uses

In the early sections for each preposition the test is applicability to situational teaching in class. From the host of nouns which can often be used a few are chosen because, with the preposition, they lend themselves to quick demonstration or scene-setting in a classroom. For example, ON §4 reads:

He carried it ON his back.

He carried it ON his shoulder.

She carried them ON her head.

She carries it ON her arm.

She holds them ON her lap.

She rests it ON her knee.

This series can be presented in a trice by the teacher's movement of one or two objects on a student's back, shoulder, head, etc. Other concrete nouns which fit the pattern, e.g. *nose*, *pillion*, are rejected. Rapid oral tense changes with all three verbs can then be practised. The text also changes in the person of the subject and in the number of the object. All these may be exploited for further practice if required.

ii. Non-demonstrable uses

The material in the later stages is organized to bring out the meaning of the preposition by the use of one noun and its synonyms and near-synonyms, thus reducing to a minimum time-consuming explanations by the teacher.

AT 57. Singular noun

They're AT variance on this.

They're AT enmity.

They're AT war.

They're AT issue.

AT 58. Plural noun

They're AT odds on this.

They're AT cross-purposes on these.

They're AT loggerheads on this.

They're AT daggers drawn on these.

Here too there is secondary organization of the material on related linguistic features; in this case on whether the noun is singular or plural. An interesting by-product of organization on this principle is the codification of many phrases usually regarded as 'idioms' or 'exceptions'.

The brevity of the prepositional phrase can be used with great advantage to support the learning of vocabulary, a necessity which it is still perhaps fashionable to overlook, but which the student cannot overlook.

Use of the material

Only the very advanced student who has outgrown all teachers should attempt to use this book as a reader. The book is intended mainly as a source of oral drill, practice material, reading and dictation for use with classes or groups at all levels of instruction in the language.

Order of presentation

The numbered subsections for each preposition are arranged in approximate order from the most direct demonstrable use of the preposition to its most difficult abstract use. Only the most advanced students can work straight through any single preposition. In some cases the degree of difficulty of the noun in the prepositional phrase is the deciding factor in the progression of the sections.

In most cases the teacher should select subsections at roughly the same level from each of the prepositions in turn.

i. The demonstrable uses

A possible procedure is illustrated by reference to AT §I --

He's AT the door.

She was AT the window.

He's AT the table.

etc.

The text shows a change in tense which can be transformed in situations to two sets of examples:

He's AT the door. and *He was AT the door.*

She's AT the window. *She was AT the window.*

He's AT the table. *He was AT the table.*

etc.

etc.

- a Presentation: The teacher directs students to the various positions in the classroom, or to a position and away again, providing the model utterance for all examples, first in the present and then in the past tense.

b Drill: The class practise the sentences in response to gestures from the teacher indicating the visual situation in the classroom. To practise the past tense the teacher might indicate the student who has moved and the position he has moved from. At this stage students do not use their books.

c Further practice: Suggestions are made in the text for further practice and exercises. These suggestions cannot cover all the ways of 'exploding' the text for practice or revision as required. Generally the prepositional phrase remains as in the text while changes are made elsewhere, e.g. to the verb

He's standing AT the door.

She's standing AT the window.

He was standing AT the door.

She was standing AT the window.

Was he standing AT the door?

Was she standing AT the window?

and so on. Much of the copious oral practice required in the early stages of language learning to fix the features of the 24 special finites in questions, in negative statements and in question tags can be provided easily and quickly by the use of these brief prepositional phrases. Changes are also possible in many cases to the passive voice, to the negative, to the interrogative-negative, etc. The subject may be changed, and in the case of *s+v+o+prepositional phrase*, the object makes a third possibility for substitution. In some cases a change is suggested in the phrase itself, e.g.

He's standing AT his window.

She's standing AT her door.

etc.

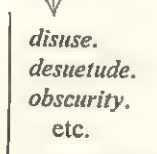

d Reading or dictating the text to fix, revise or test students oral-aural skills may be the final step.

ii. The abstract uses

When this more advanced stage is reached, work from the blackboard or reading from the text may be the first step in presentation of the subsection but the relation with a demonstrable use should have been established previously where possible. The extent to which the teacher has to emphasize or develop the links between the physical and abstract vocabularies will be variable and may depend upon such factors as the students' mother tongue or their intelligence. Blackboard sketches may

prove very useful, or an arrow or movement may illustrate abstract destinations as in this example with INTO.

They sank INTO

disuse.
desuetude.
obscurity.
etc.

A possible procedure may be illustrated by reference to AT §53 –

They are sailing AT high tide.

They were sailing AT low tide.
etc.

a Revision: Relate to AT §24

She woke AT first light.

which has previously been related to the *demonstrable* AT §5

It arrived AT 5.13.

b Presentation and reading of §53.

c Practice as suggested in the text; also, according to the standard of the class, by the use of additional prepositional phrases as encountered by the students in other sections, e.g.

They will be sailing AT high tide ON Monday.

They sail IN an hour AT high tide.
etc.

There are examples of such synthesis in a few subsections but the possibilities are almost unlimited.

How much and how often?

Three or four minutes of each language lesson could with profit be spent on material chosen from this book to suit the class, their lexical needs, the syllabus, remedial problems, or the special difficulties of the students. Some of the advantages of short, brisk practices from the book have been outlined above. The student will often appear to be more interested in the noun in the prepositional phrase than in the preposition itself. This is unimportant: the repeated use of the preposition with the group of nouns will ensure that he develops a feeling for the meaning and correctness in the use of the English prepositions.

Notes on the prepositions treated

The rest of this Introduction is devoted to discussion of certain semantic aspects of the usage of individual prepositions.

Reference is to subsections of the section of the text dealing with the preposition under consideration.

at

at – a point

AT appears to be one of the more consistent, semantically speaking, of the English prepositions. Almost invariably it designates a point, commonly a point in space. From *AT the centre* (§1), *AT his desk* (§1), *AT the front* (§4) the point enlarges to include *AT home* (§13), *AT Gloucester* (§21). But while the point which AT designates may vary in size, there is the idea of no movement outside the point always present.

at in time

Space and time are treated very similarly in English. AT thus transfers to time and must be the commonest preposition of all those associated with time; any point on the clock is named with AT – *AT 6.16* (§5). But again the point enlarges, varying from accuracy to the second to *AT dusk* (§24) which is as long as *AT twilight* (§24), and even lengthening to a week-end – *AT the week-end* and *AT Christmas* and *AT Easter* (§10). We may hope for the sake of consistency that these last examples represented initially a point in time which English usage in the nineteenth and twentieth centuries has lengthened with changing custom.

at indicating occupation

The fact that a person is AT a place seems to be accepted as evidence of what he is doing. In answer to *Where are they?* we may get:

<i>They're AT church.</i> (§13)	or	<i>They're AT work.</i> (§15)
<i>They're AT school.</i>		<i>They're AT play.</i>
<i>They're AT university.</i>		<i>They're AT prayers.</i>

If a person is *AT church* it is a reasonable assumption that he is also *AT prayers*. Compare *IN church*, which does not appear to have the same strong hint of occupation. In the examples on the right the place,

verbally neglected in favour of the occupation, is probably understood.

This concept can be developed to include a group of nouns which designate a point in both space and time:

They're AT the wedding. (§14)

They're AT the meeting.

They're AT the match.

They're AT the races.

at in space

Not unnaturally, considering its affinity with *point*, AT is used in several sections which develop this link, notably 18, 23b and 40.

AT this point (space and time)

AT danger point. (§18)

AT the point of no return. (§18)

AT a point six inches from the table. (§19)

AT breaking point. (§40)

Similarly the *beginning* and the *end* are seen as points and are used with AT (§§27, 16). Their synonyms and equivalents are set out in the chart on page 7. If, however, the beginning or end is viewed by the speaker as a period, AT will be replaced by IN (IN §71).

We would expect so definite a point as is described by the word *intersection* or its equivalents (*join* etc.) to be associated with AT and this is in fact so (§20). By extension the clash or crossing of two wills gives us phrases introduced by AT (§§57 and 58).

at with abstract vocabulary

Modern English uses AT for all points on a scale, whether it is a scale of prices (§29), speed (§36), temperature (§41), pressure (§42), or heat (§41). The upper and lower limits of numbers, scales, dials, and even qualities are seen as points, and the equivalents of *least* and *minimum* with *most* and *maximum* provide prepositional phrases with AT (chart, p. 7). As these are all seen as unique single points the entire group is associated with *the* and can provide excellent drills in the use of the article, as indeed can *beginning* and *end* and their equivalents (§27).

Perhaps the only real exceptions to the rule that AT designates a point are those uses with the group of nouns in §59: *AT sea*, *AT liberty*, *AT large*, *AT leisure* etc. Does the English speaker see these as a point on a boundless surface?

in

Basic meaning: enclosure

The basic meanings of **IN** are enclosure and inclusion. The extent of enclosure is variable – from, for example, *The bird is IN the cage* (§19) to *He was IN a white tie and tails* (§55).

Neat as it might be, it is unfortunately impossible to say flatly: ‘The principal meaning of **IN** which can be physically demonstrated is enclosure, and §§1–x cover this use.’ This is one of the cases in which it has been necessary in this book, as explained above, to make the difficulty or rarity of the noun in the prepositional phrase the deciding factor in the organization and progression of the section.

With total enclosure **IN** is invariably used. In §§1–4 **IN** designates enclosure on three or four sides. *We are IN the playground* (§5) is also enclosure but in a much more limited sense. In §6, *There’s dirt IN the water*, immersion or solution in a liquid is seen as enclosure, while §12, *It’s IN the light*, shows enclosure in a new medium. Other degrees and variants of enclosure are seen in

He has a book IN his hand. (§7)

The picture’s IN the frame. (§14)

He’s IN his seat. (§15)

They’re IN a circle. (§16)

The key fits IN the lock. (§21)

§19 is total enclosure, but the nouns in the prepositional phrases, naming the habitations of domestic animals or pets, are not of sufficient general value to justify an earlier treatment.

in with manner or form

Fold it IN two (§8) introduces a new semantic variety: **IN** a manner or form. §9 reinforces the idea. §13, *Make your ‘th’ IN this way*, is a development which merits early treatment because of the importance of the link between **IN** and *way*. §20, *Please write IN ink*, is the third example of form, whilst further examples of **IN** in phrases of manner are found in §§23, 26–31.

in a state or condition

The meaning here is closely related to the meaning just studied, and it is not easy to say whether *The cup is IN pieces* (§88) and *The clothes are IN rags* (§89) are examples for form or condition. (They give practice in the use of **IN**-phrases containing a plural noun, just as *Jean is IN a*

dream (§94), another example not easily placed in one or other of these meanings, shows *a* with *IN*.)

The presentation of *IN* with a state or condition occurs first in §42, *The bowl is IN motion*. A state is clearly implied in *You're IN safety* (§80) and *You're not IN private now* (§86). This variety probably accounts for most cases of the association of abstract nouns with *IN*: the physically demonstrable uses

They sang IN time. (§90)

My nails are IN a dirty condition. (§91)

The sugar is IN solution. (§95)

lead to:

IN infancy they are harmless. (§99)

The peach trees are IN bud. (§100)

He told us IN secret. (§101)

Partly because *IN* is used with states of mind

Jim was IN a daze. (§94)

Tom is IN a temper. (§103)

He's IN doubt. (§124)

it is especially frequent in religious writings: *IN spirit and IN truth*; *IN prayer and supplication*. At the same time its use with physical conditions raises its frequency in this area: *IN majesty*; *IN glory*; *IN sickness and IN health* (§123); *IN peace* (§124); *IN the shadow of death*.

in order

Still related, in a sense, to enclosure are the meanings associated with *place* and *position* (§22). From this it is a short step to

Put them IN order. (§22)

because an order or sequence (§24) may be regarded as a form of enclosure.

in with inclusion

There's someone IN the house (§18) is an example of enclosure – a person is not a part of a house. We distinguish as inclusion *There's oxygen IN the atmosphere* (§41) because oxygen is an integral part of the atmosphere. The concept of inclusion is developed in

She's IN the tennis team. (§45)

There's one r IN 'around'. (§82)

There's a 7 in this number. (§83)

There's a mistake IN this word. (§84)

There's an error IN this line. (§85)

in with time

Time phrases introduced by *IN* designate a period, usually a period encompassing the occurrence to which the utterance refers. The months, seasons and years (§§61–2) are such periods of time and are invariably associated with *IN*, but any time units are used with *IN* where the idea is 'within the period' however short. With the shorter units in particular, an *IN*-phrase often means before the expiry but at the end of the period named.

We are leaving IN two minutes. (§63)

I'll be there IN a second. (§64)

We'll finish it IN an hour. (§65)

An *IN*-phrase using the noun *time* may have this sense; *Jack'll be 16 IN a year's time* means at the end of the period. But most *IN*-phrases using the nouns *time* (§§69–76), *interval* (§70), *past* and *future* (§71), *while* (§72) and their equivalents indicate a period. It is perhaps worth noticing that while the *past* and the *future* are seen as periods (*IN the past everything was all right*; *IN the future everything will be all right* – §71), the *present* is seen by the English speaker as a point (*AT present*; *AT the present time* – *AT* §7).

The extension of the use of *IN* for period to process seems reasonable.

in with the gerund

§98, further subdivided, shows *IN* followed by the gerund:

I said 'Hullo' IN passing. (§98 – 1)

IN opening the door, I hit my head. (§98 – 2)

Contrasts with *ON* are also presented:

IN opening the door, I broke the lock. (§98 – 3)

ON opening the door, I heard footsteps.

IN considering this case we must keep all the facts in mind. (§98 – 4)

ON considering the case, we found we had not sufficient information.

and as exercises suggest, the participial phrase with *IN* can here be replaced by a *while* clause, that with *ON* by a *when* clause. The *IN*-phrase again indicates a period of time.

The use of *IN* with certain abstract nouns (*IN an attempt to strike a match, I burnt my finger*; *IN the endeavour to strike a match, I burnt my finger* – §46) may be related to the use of *IN* with a gerund (*IN attempting*; *IN endeavouring*). There may be some sense of enclosure here; the phrase suggests absorption in the action.

in with commercial and technical vocabulary

Although there are no new meanings involved in the use of **IN** with commercial and technical vocabulary, its role in these areas is so valuable that some comments may not be out of place.

IN with the basic meaning of enclosure has links with the names of containers and packs of all sorts (§§1-3). **IN** with condition may convey a commercial stipulation (*IN prime condition*; *IN stock* - §§91, 111). **IN** with form is seen in examples such as *IN bulk* (§109), *IN half-pound lots* (§110). We may relate the **IN** so common in commercial correspondence (*IN answer to*; *IN acknowledgement of*; *IN confirmation* - §115) to the **IN** considered above in use with such abstract nouns as *attempt* (§46). Administration must naturally be definite as to what applies *IN this case* (§114), and here the relation to be established may be with a series or sequence (§§22, 24).

in with comparison

IN has a particularly important role in comparison. The **IN**-phrase acts as an indicator of the quality selected for comparison:

They are alike IN size. (§119)

This car is outstanding IN performance. (§118)

There is all the difference in the world between the statements

They are equal.

and

They are equal IN length.

between

They are different.

and

They are different IN function. (§117)

The gain in precision resulting from the use of the **IN**-phrase is of very great significance for the conveyance of analytical and abstract thought. Some idea of the flexibility of 'slotting' for this purpose is given by §§116-119.

doubles

English is like many other languages in using repetition for certain effects. *IN rain and (IN) shine*; *IN sickness and (IN) health* (§123) exemplify the use of two **IN**-phrases for contrast. **IN**-phrase repetition for reinforcement is seen in §124: *IN peace and (IN) plenty*.

OF

OF is unique among English prepositions on several counts. Not only is it the most frequent of all prepositions, but it has a special role structurally. All other prepositions are in general used in the combination:

PREPOSITION (+ DETERMINER) + NOUN

OF, apart from its use with a small number of nouns (*OF course*, §83; *OF importance*, §87), invariably occupies the pivot position in the formula:

(DETERMINER +) NOUN + *of* (+ DETERMINER) + NOUN

parts and qualities **OF** a whole

OF is by derivation related to *from* and its simplest and commonest use is in establishing a link between noun and noun, the first noun naming a part or quality of the whole named by the second noun:

This is the back OF the chair. (§1)

That's the top OF the basket. (§3)

I dislike the shape OF the basket. (§74)

It had the hardness OF steel. (§78)

By a natural extension the 'part' idea (*a piece OF iron*, §22) is found in units of measurement

Here's a pound OF rice. (§15)

Here's a handful OF earth. (§17)

That's a load OF stones. (§28)

and in numbers

Three OF them had to go. (§8)

and fractions

A half OF it is bad. (§11)

OF does not possess the remarkable variety of meanings which characterizes some other prepositions. Variety there is, but only within the broad realm of 'a part' and 'a quality'. Nevertheless OF can be extremely important in the learning of the linguistic features of the English noun, especially in its countability and in its compounding and what these involve in linguistic terms.

of with countable and uncountable nouns

In many parts of the world the distinction between countable and

uncountable nouns in English, including the signs of the plural and the use of omission of articles, requires all the support in teaching that can be given and at all levels of learning. The vocabulary for use with *OF* in this text is chosen with this fact in mind. *Here's a box OF matches* (§14) contrasts with *This is a bottle OF water* (§15); *a handful OF peas* (§16) appears alongside *a handful OF earth* (§17), and so on.

compound nouns

Another semantic link is exploited to provide the student with practice in the formation and stressing of the English compound noun.

<i>It's the nail OF a finger.</i>	<i>It's a finger nail.</i> (§36)
<i>Put it in the pocket OF my coat.</i>	<i>Put it in my coat pocket.</i> (§37)
<i>This is the door OF the bathroom.</i>	<i>Who was at the bathroom door?</i> (§38)
<i>It's a tie made OF silk.</i>	<i>It's a silk tie.</i> (§39)
<i>This is the level OF the sea.</i>	<i>This is sea-level.</i> (§45)

These matters of vocabulary are incidental. In fact *OF* is so useful and therefore so ubiquitous a preposition that only token examples can be given of its enormous range and frequency.

ON

ON is the preposition with the greatest differences between its many meanings. By comparison *OF* and *TO* are monolithic as to meaning, *AT* a mere trifier. *IN* is a poor second to *ON* in the number and variety of meanings.

on in space

This preposition is remarkable for the diversity of its meanings connected with spatial or physical concepts. We go from *There's a book ON the table* (§1), where no movement is expressed or implied, to *Put it ON the table* (§2), where the verb expresses the only movement associated with *ON* at the demonstrable level. This lack of movement is further considered below.

In the demonstrable uses of *ON* we begin to move away from a concept of support from beneath when we meet:

Flies walk ON the walls. (§7)

Flies walk ON the ceiling.

though the idea of contact and attachment is still present, as it is in the case of

There's a scar ON your chin. (§9)

§13 shows a link (*The pocket is ON one side*) between these and *They are ON my left*. Then comes a use which is of great frequency in technical matters but which can be very easily presented and drilled with parts of the body:

She had a ring ON her finger.

She had a watch ON her wrist.

She had a bandage ON her ankle.

(When we reach larger parts of the body, such as *neck* and *waist*, ON cannot be used, and ROUND will be substituted.)

The idea of attachment is still present, though contact may be less evident, when we meet (§18)

There's a string ON the stick.

There's a hook ON the string.

etc.

and (§19)

The dog is ON the chain.

Perhaps these are best taught through sketches or through situations approximating to these sketches.

§18

ON the chain.

§19

*ON the stick.
ON the string.
ON the hook.*

This leads to phrases such as *ON the list* (§26).

Already there is some overlapping in meanings. When we say, for instance, *There's a number ON this car* (§25), is the idea that of attachment, or is it that of a mark on the surface? In saying *Your name is ON the list* (§26) are we seeing the name as attached to and forming part of a column of names, or is it a matter of a written symbol in contact with a flat surface? It is difficult to be sure even at this simple level. At advanced levels such overlapping in meanings is a constant characteristic of the uses of ON. Examples will be found in ON-phrases related to *ON a list*:

He is ON the staff. (§79)

etc.

At §29 we meet a further overlapping. A thing may rest *ON its side* *ON the table*. When a thing is being supported by another thing, ON is used both with the noun naming the support (*table*) and with the name

of the part in contact with the support (*side*). §47, *He fell ON his face ON the ground*, reinforces this concept.

on with time

ON has an invariable link with (-)day:

It's ON Sunday. (§32)

It was ON Christmas Day.

The noun *day* is used with only one other preposition and in only two senses – *in his day*, *in those days* (IN §75) and *in a day*, *in a few days* ('time') (IN §§65, 66) – when in both cases a period of time is understood. The link with (-)day applies when the name of a day of the week precedes *morning*, *afternoon*, *evening*, and *night* (§33 – *It was ON Saturday night*) although these words usually follow IN when the day of the week is not named (IN §67). A similar invariable link exists between ON and the date:

It was ON 30th June. (§34)

It happened ON the night of 8–9 January.

The last links with time words to invite notice are the series of nouns in §38 (*ON time*, *ON schedule*, etc.) and the group in §39 (*ON the stroke of three*, etc.), where in both cases the ON-phrase denotes exact punctuality. Perhaps, indeed, the word 'exact' may suggest some relation between the ON of these time phrases and the ON of contact considered above.

on a subject

§§70–78 illustrate the use of ON with nouns naming a subject or topic:

He will write ON this subject. (§70)

The opportunity is taken to present examples with the four common verbs *give*, *make*, *put*, and *take* and the structure

S + V + D.O. + PREPOSITIONAL PHRASE

He gave a sermon ON the golden rule. (§73)

He made a statement ON immigration.

Action will be taken ON this report. (the passive counterpart of the pattern).

on a line

It is not a long step from *There's a spot ON the paper* (§11) to a number of demonstrable uses of ON beginning with

The dot is ON the line. (§52)

The settlement was ON the frontier.

and including the concept of ON with different levels:

They are ON the ladder. (§49)

They were ON the third rung.

They were ON this level.

and

They are ON a slope. (§53)

It is ON the edge. (§54)

We have seen the use of AT with points on a scale (AT §42). When the speaker is concerned with 90 m.p.h. not as a point on a scale but as an exact line reached and held, ON is used:

The needle is ON 90 m.p.h. (§50)

Probably there is also here the idea of continuation of action at the rate named; this is suggested by such examples as:

The motor is ON 5000 revolutions.

The indicator is ON 'Charge'.

movement

Almost all the semantic varieties of ON considered above involve a concept of static conditions. The exceptions are *Put it ON the table* (§2) and, as we have just seen, possibly *The needle is ON 90 m.p.h.* There is, however, an important group of abstract nouns which in prepositional phrases with ON incorporate a concept of continuing activity or arrangement through time. For the English speaker ON in phrases like *ON the watch* (§89), *ON sale* (§92), *ON this basis* (§99), *ON a diet* (§102) has a fundamental link with movement – movement through time.

Active movement is involved to some extent in all of the following:

He is ON foot. (§65)

He is ON his bicycle. (§66)

They're ON the way. (§67)

The advance ON the capital had begun. (§68)

They are ON a message. (§69)

§§88–105 present phrases which symbolize what for want of a better description we might call a 'continuing arrangement through time'. This entire group from *ON watch*, *ON guard*, *ON alert* to *Our men are ON bread and water* (§105) gives an impression of modernity, of reflecting the administrative complexity of our times. It is difficult to see how a hospital or the armed services could function without ON, and if the future for us all holds greater complexities of administration, then ON seems set for a brilliant future.

TO

movement and destination

Compared with that Jack of all trades *ON*, the preposition *TO* has remarkably little semantic versatility. For the English speaker *TO* indicates movement and a destination. In a sentence such as

Have you the twin TO this sock? (§44)

the concept of movement may not be clear. It is probably true to say that the idea behind this use is that the two socks should be brought together to make a pair, and this movement justifies the use of *TO*. (The fact that *OF* may be used in the example does not affect the argument.)

link with the verb

This fact that movement is always expressed or implied means that *TO* generally has a complete dependence on the verb of the sentence. Consider a single example:

He's going TO the harbour.

Any common noun denoting destination can be substituted for *harbour*, and *go* can be replaced by such verbs as *drive*, *come*, *hurry*, *run*, but it cannot be replaced by *be* ('He is to the harbour'), *have*, or *like*. The verb in such a sentence must be one which expresses movement. These will be intransitive verbs mostly but intransitive verbs like *carry*, *bring*, *transport* may be used.

two sections

Because of this close link between *TO* and the verb, the material has been divided into two sections. In the first (§§1-106) we are concerned with those uses of a *TO*-phrase generally applicable to a large number of verbs which describe movement. In the second the ties between the verb and the prepositional phrase are so close that it was necessary to set down the phrases with the specific verbs to which they are bound.

Wherever possible, in both sections, the *TO*-phrase is used with both transitive and intransitive verbs in two of the simplest sentence patterns:

Pattern 1 *S + V + D.O. + TO-PHRASE*

Pattern 2 *S + V + TO-PHRASE*

first section

The obvious demonstrable uses of *TO* are those in which the preposition denotes lateral movement. Apart from varying the types of motion by

speed and manner (§§10, 11), it is almost impossible to give to *to* at this elementary physical level coverage proportionate to its frequency.

It is interesting to observe that, as with *at*, meals are referred to as if they were places:

Come TO breakfast. (§16)

Indeed this 'occupational overlay' is seen in a number of examples in §§7, 8, 15.

The link between the verb *give* with its variants and *to* is an important one, and this idea of destination is also present with *speak* and its variants. Token examples of both uses are given (§§22-5).

kinds of movement

Lateral movement is still implied in

Pattern 1: *He brings the machine TO a stop.* (§30)
and Pattern 2: *The machine comes TO a stop.* (§31)

These are perhaps the two most valuable physical presentations of the meaning of *to*: they are the demonstrable basis of a great deal of advanced work, and they introduce the link between *bring* and *come* which is shown in the second section to be of great importance in the manipulation of abstract vocabulary in *to*-phrases. Other meanings of *to* in Section 2 are related to examples in Section 1 of physical movement downwards (§§32-3), upwards (§§34-7), and back and forth (§§38-41).

nouns followed by *to*

§42 (*Show me the way TO the post office*) clearly shows destination, as does §43 (*There's the track TO the river*) and, by implication, §46 (*This is the gate TO the garden*). The idea of movement is less obvious in:

Have you the key TO the door? (§44)

He is without shoes TO his feet. (§45)

This is the key TO the puzzle. (§47)

but if the student can be helped to appreciate the implication of movement on a physical level here, he will find advanced work easier.

addition and application

From the evident movement of

She's adding salt TO the stew. (§50)

He's adding sugar TO his coffee.

it is not a long step, semantically, to

This gives taste TO the mixture. (§51)

This gives strength TO that belief.

and thence to the examples under *G* in Section 2:

He added insult TO injury.

He attached (no) importance TO these conditions.

A further development may be seen in

He leaves the place TO his neighbour. (§64)

We leave the room TO the next class.

This may be seen as an extension of the idea of addition to the possession(s) of someone or something else. There are other examples with abstract nouns in §65:

I leave the answer TO your imagination.

They left nothing TO chance.

and under *G* in Section 2:

He conceded freedom TO the estates.

Related to the idea of addition is the concept in

He's holding a match TO the flame. (§54)

and this meaning – application of one thing to another – is developed in §55 (*He will appoint him TO the position*) and echoed in the examples under *E* in Section 2:

He's putting his mind TO his work.

I'm using it TO our mutual advantage.

etc.

The idea of destination is strong here.

Movement through time is the concept expressed in *From the first TO the last . . .* (§62) and in the examples, many of them reflecting states of mind, in §63:

She goes from smiles TO tears very quickly.

To a degree

The presentation of *to* in expressions of degree begins at §71:

It's right TO an inch.

The English speaker still attaches the idea of movement to the prepositional phrase. He sees the pattern as answering the question

How far?

The same idea of movement is present in

He'll pay TO the last penny. (§72)

It covers it TO a small extent. (§73)

She's a lady TO her finger-tips. (§74)

He was faithful TO the last. (§75)

In Section 2, under B, this idea is developed in the use of TO-phrases after a variety of English verbs. These verbs include *fit*, *adjust*, *gauge*, *measure* and, in another group, *calculate*, *estimate*:

They are adjusted TO fine tolerances.

They calculated the answer TO the nearest millimetre.

There is certain to be a constant increase in future in the number of such TO-phrases in English to express succinctly in scientific and technological terms this idea of degree. A related use of TO is seen in the collection of phrases in Section 2 under F, all conveying the general meaning 'as required'. This is merely degree to a nominated extent.

to following adjectives and nouns

Movement by way of juxtaposition for comparison may be seen in *It's equal TO this* (§76). This idea is developed in §§77-81, a series of examples showing a TO-phrase following an adjective. A parallel is shown between

They're resistant TO change. (§82)

and, with the corresponding noun taking the place of the adjective,

Their resistance TO change is established. (§83)

The remainder of the subsections in Section 1 show mainly nouns which are followed by TO. It is still possible to trace the idea of movement or destination except, perhaps, in §94, where the notion is one of accompaniment:

He fell asleep TO the sound of thunder.

He awoke TO the tinkle of crockery.

second section

Some reference has already been made to this section. It is arranged according to the direction of movement suggested by the combination of verb and TO-phrase. Where possible physical and demonstrable uses precede the entirely abstract. The first presentation in Section 2 of a meaning which has been illustrated in Section 1 may apparently cover the same ground. For example, movement downwards is illustrated in Section 1 by *bring*, *drink*, *drain* (§33 - Pattern 1) and with intransitive construction by *fall*, *sink*, *drop* (§32 - Pattern 2). These verbs appear

again in Section 2, where downward movement is illustrated under D, but in general Section 2 presents examples of the close connexion between particular verbs and specific *to*-phrases. The number of verbs which can be substituted for *reduce* and *fall* in the sentences which follow is extremely limited

Pattern 1: *This reduced the supply of metal TO a trickle.*

Pattern 2: *The supply of metal fell TO a trickle.*

and choice is even more restricted in the case of:

Pattern 1: *They fought the enemy TO the last man.*

Pattern 2: *They fought TO the last man.*

INTO

The prepositions dealt with in this book are presented in alphabetical order with the exception of the sixth and last: INTO. The reason for this exception is that, both in form and in meaning, INTO is a combination of IN and TO, and it seemed reasonable to deal first with the elements of the combination.

The basic idea represented by INTO is fairly simple: movement towards a destination which involves enclosure. INTO plays the same part in relation to IN as TO does in relation to AT. *He is going TO the door* – *He is AT the door* is paralleled by *He is going INTO the room* – *He is IN the room*. (In the field of abstract vocabulary, however, the relationship of INTO and IN is more regular than that of TO and AT.) INTO, as we could have foreseen, fits particularly well into the two sentence patterns used for illustration of the meanings of TO:

Pattern 1: *He took them INTO the room.*

Pattern 2: *They went INTO the room.*

In a few cases TO and INTO are interchangeable (*We change the liquid TO/INTO a gas* – TO B16; INTO §43) but this is rare. As a rule one or other is used according to the 'destination', and it is interesting to compare the abstract destinations possible with TO and those possible with INTO. In general it may be that the English speaker sees the destination after TO as a point, that after INTO as an area. But the same abstract noun may in one context represent a point – the end of the line –

This reduced them TO despair. (D20)

while in another context it may represent an area – a bottomless slough –

They sank INTO despair. (§52)

Activating the use of prepositions

The preposition **at**

Mainly demonstrable in class

1 **at** a point in space

He's *at the door*.

She was *at the window*.

He's *at the table*.

She was *at the desk*.

She was *at the fire*.

He's *at the entrance*.

He's *at the centre* (of the room).

She was *at the exit*.

He's *at Death's door* (fig.).

i. PUT the subject into the plural.

ii. SUBSTITUTE 'their' for 'the'
(omit last four).

2 **at** a part of the body

It's *at your feet*.

He was *at your elbow*.

He's *at your side*.

She was *at your back*.

It's *at your heels*.

It's *at hand*.

The dog was *at heel*.

They're German *at heart*.

The cow has a calf *at foot*.

i. DRAW a sketch to illustrate all examples except the last two.

3 **at** a line

He's *at the wall*.

She's *at the board*.

They're *at the fence*.

They're *at the river*.

She's *at the hedge*.

He's *at the railway line*.

They're *at the seaside*.

They were *at the water's edge*.

i. INSERT 'standing', 'sitting'.

4 **at** a position

They're *at the front* (of the queue).

They were *at the back* (of the queue).

We're *at the rear* (of the queue).

They were *at the centre*.

You're *at the end* (of the queue).

They're *at the extremities* (of the queue).

i. PUT into the singular.

5 **at** a point in time

It arrived *at 5.13*.

It arrives *at 5.30*.

6

He came *at once*.

He's left *at last*.

They arrive *at 10.15*.

They arrived *at 10.50*.

They phoned you *at a quarter past two*.

They found him *at twenty to ten*.

i. CHANGE to: 'I'll meet you *at ...*'

He left *at length*.

He found us *at long last*.

He phoned him *at the last moment*.

He found them *at the last minute*.

i. TRANSPOSE the AT phrase to the beginning.

7

At present he's here.

At the present time he isn't here.

At the moment she's absent.

At the present moment they're missing.

At this minute I can't say where they are.

At the (that) time I didn't know.

i. TRANSPOSE, putting the AT phrase at the end.

8 **at an angle**

It is *at an angle*.

It was *at an angle of 90°*.

It is *at an angle of 19°*.

It is *at an angle of 18°*.

It was *at an angle of 80°*.

i. PRACTISE by varying numbers.

Mainly non-demonstrable

9

At the age of thirteen he was delicate.

At the age of thirty he was robust.

At 14 she was fat.

At 40 she was slim.

i. PRACTISE varying numbers and adjectives.

10

I'll be there *at (the) New Year*.

He'll be here *at Easter*.

We'll be there *at Whitsun*.

They'll be here *at Christmas*.

i. CHANGE to 'on New Year's Day' (omit Whitsun).

11

He sits *at breakfast*.

She sat *at lunch*.

We'll meet you *at tea*.

12

You saw him *at breakfast time*.

We saw them *at lunch-time*.

They found him *at tea time*.

We'll meet again *at dinner*.

We met *at supper*.

- i. REPEAT in the negative interrogative.

They phoned them *at dinner-time*.

We'll meet him *at supper time*.

Brush your teeth *at bath time*.

Clean your teeth *at bedtime*.

Brush your teeth *at all times*.

- i. TURN into the interrogative form.

at points in space (*occupation overlay*)

13 place and occupation noun

They were *at table*.

They're *at home*.

She's *at school*.

He's *at church*.

He was *at college*.

She was *at the university*.

- i. PUT into the negative.
ii. TURN into a question: 'Were they ... ?'

14 at a gathering

You'll see him *at the wedding*.

You'll see them *at the meeting*.

You'll meet them *at the party*.

You met him *at the dance*.

You met them *at the match*.

You saw him *at the tournament*.

You met her *at the final*.

They wore them *at the game(s)*.

They lost them *at the races*.

She bought them *at the flower show*.

They bought them *at the market*.

- i. TURN into the question form.
ii. TURN into the negative form.

15

They're *at work*.

They were *at play*.

She's *at practice*.

He's *at cricket*.

They were *at football*.

They're *at basketball*.

They sat *at chess*.

He sits *at cards*.

She's *at prayers*.

He was *at games*.

- i. CHANGE to the negative.
ii. INSERT 'often', 'never', 'some-times'.
iii. CHANGE to: 'I saw them at ...')

16 at a point (*the point at the end*)

They were *at the end* (of the journey).

They were *at the terminus*.

They were *at their destination*.

It was *at its source*.

It was *at its mouth*.

He was *at the sword's point*.

They were *at the goal*.

They're *at the (winning) post*.

We were *at a loose end* (fig.)

- i. RESTATE in the negative form.

17 at a house or shop

They weren't *at home*.
They're not *at 32 Kent Street*.
They aren't *at the farm*.
There aren't many *at the shop*.
There weren't any *at the store*.
There weren't any *at the grocer's*.
There aren't any *at the butcher's*.
There weren't any *at the news-agent's*.
There aren't any *at the baker's*.

- i. PUT into the simple future tense.
- ii. RESTATE in the affirmative.
- iii. CHANGE to: '*They met them at . . .*'

19 at this (nominated) distance (demonstrate first three)

They're *at a distance of 3 ft from the table*
at 6 ft from the table.
at nine feet.

They opened fire *at a range of 200 yards*.
They opened fire *at 200 yards range*.
They opened fire *at 200 yards*.
They fired *at point blank (range)*.
They fought *at close quarters*.

- i. PRACTISE by changing the numbers in the first six examples.

20 at the join

It's weak *at the join*.
They're thick *at the joint*.
It's wide *at the intersection*.
They're narrow *at the junction*.
It's feeble *at the juncture*.
They're busy *at the cross-roads*.

- i. SUBSTITUTE the comparative of the adjectives.

18

We were early *at the rendez-vous*.
We're earlier *at the meeting place*.
We'd be *at the supply point*.
We were *at the turning point*.
It's *at danger point*.
They're *at a critical point*.

- i. PUT into the simple future tense.

21 at towns (not large)

Their house is *at Windsor*.
The house was *at Gloucester*.
Their houses are *at Worcester*.
The house was *at Berwick*.
Their house is *at Derby*.
They're studying *at Oxford*.

- i. RESTATE in the negative.

22

We saw him *at the sale*.
We saw them *at the zoo*.
We saw them *at the theatre*.
We saw him *at the cinema*.
We saw him *at the fair*.

23a **at** one end

It roared *at arm's length*.
It rode *at anchor*.
They're *at the end of their tether*.
They were *at their last gasp*.
They're *at their wit's end*.
It turned *at bay*.

23b **at** the other end

He held him *at arm's length*.
He held them *at bayonet point*.
He holds them *at pistol-point*.
He held him *at sword's-point*.
He held them *at bay*.

at with points in time (*continued*)

24 **at** points (*in the day*)

She woke *at first light*.
He rose *at dawn*.
She got up *at sunrise*.
They woke *at sunup* (U.S.).
They dressed *at peep of day*.
She ate *at midday*.
He ate *at noon*.
It pours *at dusk*.
It purrs *at twilight*.
They walk *at evening*.
They woke *at dark*.
They slipped out *at last light*.
They slipped out *at nightfall*.
They awoke *at moonrise*.
They awake *at midnight*.
They crept out *at dead of night*.
Exception: They slept out *at night*.

i. READ ALOUD beginning each sentence with the prepositional phrase.

25 **at** intervals

They cheered *at intervals of 5 minutes*.
They jeered *at times*.

They choked *at moments*.
They joked *at odd moments*.
They walked *at random*.
They worked *at will*.
They help *at need*.
It'll do *at a pinch*.
It'll do *at a stretch*.

i. REPEAT beginning with the prepositional phrase.

26 time (continued—See *Oral practice chart overleaf*)

<i>At first.</i>	<i>At (long) last.</i>
<i>At first sight (light)</i>	<i>At last light (sight)</i>
<i>At birth.</i>	<i>At death.</i>
<i>At the earliest.</i>	<i>At the latest.</i>

27

<i>At the start</i> (of the race).	<i>At the finish</i> (of the race).
<i>At the beginning</i> of the year (January).	<i>At the end</i> (of August).
<i>At the commencement</i> (of his speech).	<i>At the conclusion</i> (of his speech).
<i>At the opening</i> (of proceedings).	<i>At the close</i> (of proceedings).
<i>At the outset.</i>	
<i>At the birth</i> of the prince.	<i>At the death</i> of the king.
<i>At the onset</i> of the disease.	
<i>At the outbreak</i> of the disease.	<i>At the termination</i> (of the enterprise).
<i>At the inception</i> (of the enterprise).	<i>At the completion</i> of the work.
<i>At the point</i> of departure.	<i>At the departure</i> of the convoy.

i. COMPLETE the sentences begun above.

28 **at an angle** (*continued*)

It goes off *at a tangent*.
It approaches *at a gradient of 1 in 100*
It descends *at an incline of 1 in 5*.

- i. PUT into the simple past tense.
- ii. PRACTISE by changing numbers.

Oral practice chart

HORIZONTAL=Points of beginning and ending VERTICAL=Points in degree
AT CENTRE=Points of intersection

<p>At its highest point. — At melting-point. — At the melting-point of titanium. — At boiling-point. — At this pressure. — At this temperature. —</p>		<p>D At the head of the department. At the top (summit, peak, apex). D At (the) most. E At (the) best. G At the prime. R At their finest (clearest). E At its fullest development. E At his most inspired moments. At the utmost. At the maximum. At maximum output. At greater heights. At great heights. At the height of his career. At the highest pitch. At a high figure.</p>	
<p>A At first. At the start of the race. At the beginning of the race. At the commencement of the race. At the opening of the door. At the earliest (convenience). At birth. At first sight/light. <p>ii Put <i>very</i> in front of noun in A, B, C, wherever there is an article.</p>			
<p>iii Put <i>right</i> in front of the whole phrase in A, B, C, where there is an article.</p>			

commercial

29 at a price

They're selling at 2/- a dozen.

They're buying at 3/6 a pair.

They were selling at 5/- a pound.

We bought them at a dollar a pound.

We sold them at 5c. a foot.

i. RECAST on the pattern:

At 2/- a dozen they're not cheap.

30

We'll sell at the price.

We'll sell at the figure.

We'll sell at (the) valuation.

i. CHANGE 'We'll' to 'They'd'.

32

We'd sell at a loss.

We'll sell at a profit.

We'd sell at a gain.

We'll sell at a discount.

We'd sell at a premium.

We'll sell at cost.

We'd sell at face value.

We'd sell at par.

We'll sell at valuation.

i. RECAST on the pattern 'They were sold at a loss'.

ii. SUBSTITUTE 'buy' for 'sell' throughout.

34

They'll do it at their cost.

They'd do it at their expense.

They'll do it at their risk.

31

We'd sell at a price.

We'd sell at a higher price.

We'd sell at that figure.

We'd sell at a higher figure.

i. CHANGE 'We'd' to 'They'll'.

33 miscellaneous

They were at a loss.

Maintain output at any cost.

Contain output at all costs.

They came and went at will.

They came and went at whim.

35

They've bought at current rates.

They bought at normal rates.

They worked at penalty rates.

They'll do it *at the owner's risk*.
They'll do it *at their own risk*.

i. PUT into the negative.

They sold *at a higher rate*.
They're sold *at a lower rate*.

i. USE the verbs in the passive voice: *They've been bought at current rates*.

36 *at a rate (rate is seen as a point on a scale or dial)*

They were travelling *at 13 miles an hour*.

They were travelling *at 30 miles an hour*.

They were driving *at 14 miles an hour*.

They were driving *at 40 miles an hour*, etc.

i. SUBSTITUTE 15, 50, 16, 60, etc. for figures given.

37

They came *at a snail's pace*

They came *at a walk*.

They came *at a run*.

They departed *at the double*.

They departed *at a gallop*.

i. INSERT appropriate adjectives after 'A' (omit first and fourth).

38

They worked *at a steady pace*.

They worked *at a steady speed*.

They walked *at a steady rate*.

They orbited *at a steady velocity*.

They progressed *at a steady momentum*.

- i. SUBSTITUTE 'fast', 'slow' and 'given' for 'steady'.
ii. SUBSTITUTE 'this', 'that', 'their former' for 'a steady'.

39

They were away *at top speed*.

They were on the way *at full speed*.

They are on their way *at full steam*.

They went by *at full stretch*.

They departed *at full throttle*.

They ran *at full tilt* into the door.

They dive *at full bore* (coll.).

They drive *at full blast* (coll.).

i. How many of the above can use 'half' for 'full'?

40

The liquid is *at boiling-point*.

The vapour was *at flash-point*.

This gas is *at the point of condensation*.

The liquids are *at freezing-point*.
The temperature was *at dew point*.

- i. MAKE sentences beginning with the AT phrase. e.g. *At boiling-point, vapour is given off*.

41a at a point on a scale

At 400°C the action ceases.
At 2000°C the metal melts.
At 200 pounds per square inch the valve opens.
At 400 m.p.h. the switch operated.
At 20,000 ft. oxygen is required.
At 5,000 revolutions the machine vibrates.

- i. CHANGE to the patterns: *It is as light as a feather* and
It is as light as down.

79 uncountable final noun

The colour *of aluminium* is invariable.
The hardness *of copper* is verifiable.
The fracture *of quartz* varies.
The malleability *of lead* is very great.
The ductility *of gold* is very great.
The chemical composition *of pyrites* is verifiable.
The crystalline structure *of tungsten* isn't variable.
The formula *of bluestone* is invariable.

- i. Where possible FORM the pattern: *Copper is hard*.

80 uncountable final noun

The characteristics *of rubber* make it valuable.
The properties *of rubber* make it invaluable.
The attributes *of rubber* make it valuable.
The resilience *of rubber* makes it invaluable.
The low conductivity *of rubber* makes it valuable.
The uses *of rubber* are variable.
The functions *of rubber* are valuable.

- i. Where possible CHANGE to:
What are the characteristics of rubber?
ii. ANSWER the questions you form for i.

81

The solubility *of the salt* has been determined.
The composition *of the salt* is being determined.
The reaction *of the salt* was measured.
The purity *of the salt* was being measured.
The density *of the salt* is being measured.

The specific gravity *of the salt* is measured.
The refractive index *of the salt* has been measured.

- i. What change of meaning occurs if the final *the* is omitted?
- ii. ADD *of lead* after *salt*.

82

The valency *of the element* is ascertained.
The specific gravity *of the element* is being ascertained.
The molecular weight *of the element* has been determined.
The atomic structure *of the element* is being determined.
i. CHANGE to: *The determination of the valency of the element ...*

P 'of' with following noun

83

Of course I can.
Of course he can't.
He did it *of his own accord*.
They did it *of their own volition*.

84

He's a man *of the people*.
They're men *of the world*.

- i. CHANGE *to*: *This is satisfying to the government* (omit last example).

92

It was done *to no purpose*.
It is done *to no effect*.
It was done *to no advantage*.
It is done *to no result*.
It was done *to his detriment*.
It was done *to no avail* (prov.).
It was *to all intents and purposes* useless.

- i. PREFIX *Thanks to you ...* to all examples.
ii. CHANGE *to*: *He did it to no purpose*.
iii. CHANGE *no* to *some* (omit last three).

93

It makes sense *to me*.

It made nonsense *to me*.

It makes a pattern *to me*.

i. RESTATE in the negative.

94 **to** = accompanied by the sound of ...

He fell asleep *to the sound of thunder*.

He awoke *to the tinkle of crockery*.

He dozed *to the noise of rain on the roof*.

They awakened *to the roar of the waves*.

They fled *to the scream of the siren*.

They advanced *to the skirl of the pipes*.

i. TRANSPOSE **to**: *He heard the sound of thunder as he fell asleep.*

95

She closed her eyes *to the sight of blood*.

She closed her ears *to the sounds of pain*.

She closed her mind *to any proposal*.

to any suggestions.

i. CHANGE **to** to **at** in the first two examples.

What difference to the meaning does the change make?

96 **all to** the good!

This is music *to her ears*.

This was a feast *to her eyes*.

This was balm *to her spirit*.

97

The teacher gave a reply *to the question*.

The teacher made no response *to the question*.

The teacher gave a refusal *to the request*.

The teacher gave an answer *to the query*.

The teacher gave a solution *to the problem*.

The teacher gave approval *to the proposal*.

The teacher gave approval *to the suggestion*.

i. TRANSPOSE to the pattern: *The student put a question to the teacher.*

ii. TRANSPOSE to the passive voice: *A reply has been given to the question.*

98

He'll play Brutus *to your Caesar*.
He'd play Cassius *to your Brutus*.
He'd play Iago *to your Othello*.
He's played Anthony *to your Cleopatra*.
He's played Goliath *to your David*.

i. CHANGE to: *He would have liked to play B ...*

99

The laurels go *to the victor*.
The spoils go *to the winner*.
The prize goes *to the strong*.
The booty goes *to the conqueror*.
The race goes *to the swift*.
The battle goes *to the brave*.

i. REREAD omitting *go(es)*.
ii. CHANGE to: *The victor deserves the laurels* (omit last two).

100

I wish to make an objection *to that statement*.
I wish to make a reservation *to that statement*.
I wish to make a qualification *to that statement*.
I take exception *to that statement*.
This is an exception *to the rule*.

i. CHANGE to: *He made no objection to that statement*.

(Three roads to one destination)

101a

He went from good *to bad*.
He went from bad *to worse*.

101b

Glances led *to words*.
Words led *to blows*.
Blows led *to murder*.
Murder led *to the chair*.

101c

Insult led *to injury*.
Injury led *to violence*.
Violence led *to retaliation*.
Retaliation led *to murder*.
Murder led *to the chair*.

102

To his credit, he did do something.
To his fame, he did his best.

To his honour, he did do something.
To his discredit, he did nothing.
To his shame, he did nothing.
To his dishonour, he did nothing.

- i. ADD an adjective to the first noun e.g. *eternal*, *great*.
- ii. CHANGE to: *It stands to his credit that he did do something.*

103

Jack took *to his heels*.
 Auntie took *to her bed*.
 Father took *to drink*.
 Mother took *to the bottle*.
 Harry took *to drugs*.
 Sis took *to reading Shakespeare*.
 Jack took *to crime*.

104 degree to the point

He's thin *to the point of gauntness*.
 She's fat *to the point of obesity*.
 She's lean *to the point of emaciation*.
 He's old *to the point of senility*.
 She's generous *to the point of folly*.
 She's weak minded *to the point of idiocy*.

- i. CHANGE to the pattern:
He's gaunt rather than thin.

105

He understood, *to his horror*, that ...
 He saw, *to his despair*, that ...
 He realized, *to his stupefaction*, that ...
 He comprehended, *to his consternation*, that ...
 He appreciated, *to his alarm*, that ...
 He knew, *to his shame*, that ...
 He saw, *to his sorrow*, that ...
 He apprehended, *to his dismay*, that ...
 He comprehended, *to his relief*, that ...
 He learnt, *to his surprise*, that ...
 He heard, *to his astonishment*, that ...
 He had heard, *to his satisfaction*, that ...
 He had word, *to his joy*, that ...
 He understood, *to his delight*, that ...

- i. COMPLETE the sentences with a suitable noun clause.

106 special affinity of **to** for *dis-*

To his distrust, she smiled.
To her disapproval, they smiled.

To their disbelief, she smiled.
To his dissatisfaction, she smiled.
To my disappointment, she smiled.
To his discomfiture, ...
To our discomposure, ...
To your disconcertment, ...
To their discontent, ...
To her discouragement, ...
To her disdain, ...
To their disenchantment, ...
To his disgrace, ...
To our disgust, ...
To the displeasure of those present, ...
To the distaste of his friends, ...
To the distress of her family, ...

- i. COMPLETE the sentences.
- ii. How many suit this context when *dis-* is removed?
- iii. REREAD inserting *great, utter, eternal*, before the noun beginning with *dis-*
- iv. PREFIX *much* to the phrases beginning with *to*.

Note to teachers

on teaching the preposition **to** to express degree

While *to* is alone among the prepositions in its singleness of meaning – destination or direction to a destination, this preposition has its own particular kind of facility to express degree. It is a preposition always indicative of movement and in English movement is usually used to express degree. *To* has therefore a special function in the teaching of advanced English where precision or exactitude of thought is required.

This use of *to* with advanced, often abstract, vocabulary to express degree and its intimate relation to movement can be exploited by the skilful teacher. The text of this section is divided into ten sub-sections based on the direction of the movement.

To take the simplest possible example, a book can be used to cover a smaller book to elicit the following vocabulary.

This small book is wholly/entirely/completely uncovered (moving larger book very slowly across the smaller book). (I am going to cover this small book by this larger one by degrees.)

The smaller book is covered *to a small extent*.

to some extent.

to a certain extent.

to a greater extent than formerly.

to a considerable extent.

to a very considerable extent.

to a large extent.

to a very large extent.

The small book is now wholly/entirely/completely covered.

(The teacher repeats the situation substituting *degree* instead of *extent*.)

(The teacher then repeats the situation, placing an obstacle (say a ruler) across the book to be covered to produce the following sentences.)

The small book is covered *to a limited extent*.

The small book is covered *to the extent that this is possible*.

The link of *to* with lateral movement (Section B) and degree can then be further exploited in the following way. A student is made to go

across the room from the door to the opposite wall pausing at the chair, the table and finally stopping at the wall eliciting: *He is going to the chair, to the table, to the wall* (Section B). Later (see section E) an analogy in (mainly) abstract vocabulary may then be presented in the same preposition:

She cooks it to my taste. to perfection. to a cinder.
to my liking. to a turn. to ashes.
to my satisfaction. to a tee. to excess.

Nor is it merely lateral movement which can be exploited in this way to express precision in degree. Movement in other directions can also be treated somewhat similarly e.g. for movement upwards (Section D):

He raises his eyes to the table to the picture. to the ceiling.
He raises his voice to a cry to a howl. to a scream.
to a bellow. to a shriek.
to a yell.

More abstract 'destinations' would have to be indicated on the board with perhaps arrows to indicate stages.

to higher levels. to great heights.
He raised efficiency to new levels. to new heights.

Movement downwards can be demonstrated firstly with a physical movement then perhaps with a sketch of an excavation with various depths marked down to bedrock to provide oral practice with numbers. The final stages might, as with movement up, be practised by means of key verbs, such as *reduce*, with the final noun of abstract 'destination' being put on the blackboard thus:

He reduced the mess to order.
to a formula.
to a drill.
to a routine.

It reduced to order.
to a formula.
to a drill.
to a routine.

Section E, TO + ADVERBIAL PHRASE MEANING AS REQUIRED lends itself to physical demonstration with the group of sentences.

He cuts this paper to size/shape/pattern/this length leading to such abstract vocabulary as:

They roll the metal to requirements.
to specifications.
to these tolerances.

The importance of such teaching in advanced work for students who

wish to use the language as a precise instrument in technical matters is obvious. Sections F, G, H, I, J lend themselves to similar treatment and throughout the entire text dealing with the abstract 'destinations' of *to*, the text, by placing synonyms as far as possible side by side, will permit of rapid exploitation on these lines.

into

While the same principle has been applied to the advanced vocabulary with *into* it may be advisable to add to the arrow used with *to* a 'container' which will, on the board, act as a recipient for the words to be taught, thus:

This sent him

He sank

<i>into a deep sleep.</i>
<i>into a slumber.</i>
<i>into a reverie.</i>
<i>into a brown study.</i>
<i>into a stupor.</i>
<i>into a coma.</i>
<i>into a torpor.</i>

It is suggested therefore that the text be followed in this wise by the teacher subject of course to the teacher's selection of vocabulary to suit any limited objective to which his class is directed. It would be a fairly rare occurrence when the entire text would be taught because the vocabulary spans very divergent types of objective from the purely 'literary' to the purely scientific.

The preposition **to**: section two

Principally abstract vocabulary

A Main verb change:

bring

STRUCTURE ONE: S. + V. + D.O. +
Adv. (TO ...)

FACIAL EXPRESSION

This brought a smile *to her lips*.

This brought a laugh *to her lips*.

This brought a blush *to her cheek*.

This brought a sigh *to her lips*.

This brought a moan *to her lips*.

This brought tears *to her eyes*.

This brought a glow *to her cheeks*.

This brought a sparkle *to her eyes*.

EXERCISE I RESTATE in the present
perfect and future
tenses.

PHYSICAL

They bring him *to me*.

They bring him *to his knees*.

They bring the dog *to heel*.

He brought the ball *to rest*.

They brought the wheel *to a stand-
still*.

They brought the train *to a halt*.

They brought the machine *to a
stop*.

They brought them *to a safe place*.

They brought them *to safety*.

They brought it *to its original
position*.

come

STRUCTURE TWO: S. + V. + Adv.
(TO ...)

A smile came *to her lips*.

A laugh came *to her lips*.

A blush came *to her cheek*.

A sigh came *to her lips*.

A moan came *to her lips*.

Tears came *to her eyes*.

A glow came *to her cheeks*.

A sparkle came *to her eyes*.

EXERCISE I REPEAT in the present
perfect tense.

He comes *to me*.

He comes *to his knees*.

(He sinks *to his knees*.)

It comes *to heel*.

The ball comes *to rest*.

They brought the army *to short notice.*

They brought the services *to a war footing.*

EXERCISE I. REPEAT in the passive voice past, present and future.

FORCE

She forced a smile *to her lips.*

He forced the matter *to a head.*

They forced matters *to a crisis*

They forced them *to a decision.*

He forced them *to an understanding.*

They forced him *to terms.*

This forced him *to the point of proposing.*

This forced him *to the realization that ...*

He forced them *to his way of thinking.*

EXERCISE I REPEAT in the pattern:
Matters were being forced to a crisis (omit first two).

They came *to no great harm.*

Things have come *to a pretty pass.*

We come now *to modern times.*

Great distinction came *to the university.*

The ship came *to instant readiness.*

The battalion came *to full strength.*

The army came *to short notice.*

The services came *to a war footing.*

EXERCISE I REPEAT in the past perfect and future tenses.

COME

A smile came *to her lips.*

The matter came *to a head.*

Matters came *to a crisis.*

They came *to a decision.*

They came *to an understanding.*

He came *to terms.*

He came *to the point of proposing.*

He came *to the realization that ...*

They came *to his way of thinking.*

If the worst comes *to the worst.*

EXERCISE I REPEAT in the perfect, present continuous and future tenses.

IT + VERB + TO + A + STOP/HALT/STANDSTILL.

The great increase in the means and use of locomotion over the past 100 years or so has not gone unreflected in the English language.

The structure IT + VERB + TO + A + STOP/HALT/STANDSTILL appears very frequently in both the oral and written language to describe the stopping of vehicles, machines and moving bodies generally. Some stylistic variants based on a change of verb to describe different kinds of movement and sound which accompany the action are given below.

movementIt *slid* to a stop/to a halt.It *slowed* to a stop/to a standstill.It *glided* to a stop.It *crept* to a stop.It *rolled* to a stop.It *ground* to a stop.It *braked* to a stop.It *bounced* to a stop.It *shuddered* to a stop.It *lurched* to a stop.It *lumbered* to a stop.It *trundled* to a stop.**sound**It *whizzed* to a stop/to a halt.It *puffed* to a stop/to a standstill.It *hissed* to a stop.It *clanked* to a stop.It *clattered* to a stop.It *rattled* to a stop.It *shrieked* to a stop.It *screamed* to a stop.It *screeched* to a stop.It *squealed* to a stop.

B 'To' with adverbials of degree: lateral movement

PHYSICAL, DEMONSTRABLE

STRUCTURE ONE: S. + V. + D.O. +
Adv. with TO.

1 pull, extend, stretch

I'm pulling the string *to the chair*.I'm pulling the string *to this point*.I'm pulling the string *to breaking point*.

STRUCTURE TWO: S. + V. + Adver-
bial with TO.

extend, stretch

The string stretches *to the chair*.The string stretches *to this point*.The string stretches *to breaking point*.

I'm pulling the string *to its full length*.

The string unwinds *to its full length*.

EXERCISE 1 SUBSTITUTE the verbs nominated for pull.

2 RESTATE in the passive voice, past present and future.

EXERCISE 1 SUBSTITUTE *extend* for *stretch* and *unwind* (omit three).

2 SUBSTITUTE a clause beginning with *until* for the adverbial phrase.

2

The white paper is covered	To a small extent	To a limited extent	To a greater extent than before	To a large extent	To a far greater extent than previously	To a considerable extent	To a very considerable extent
							
	minimum	restricted certain	formerly	great	formerly	greater larger	very great large

I'm covering the paper *to a small extent*.

to a minimum extent.

to a limited extent.

to a restricted extent.

to a certain extent.

to a greater extent than before.

I'm covering the paper *to a greater extent than formerly.*

to a large extent.

to a great extent.

to a far greater extent than previously.

to a far greater extent than formerly.

to a considerable extent.

to a greater extent.

to a larger extent.

to a very considerable extent.

to a very great/large extent.

EXERCISE 1 SUBSTITUTE *degree* for *extent* throughout.

2 RESTATE in the passive voice past, present and future.

3 SUBSTITUTE *in* for *to a* and *measure* for *extent*.

4 USE all adverbial phrases with the following sentences:

This is true ... This is untrue ... I agree ... I disagree ...

(Parts of the body or clothes)

3a

I'm biting my nails *to the quick*.
I'm working my fingers *to the bone*.

They armed him *to the teeth*.
It wets me *to the skin*.

He armed *to the teeth*.

3b strip, undress

They stripped him *to his shirt*.
They stripped him *to his vest*.
They stripped him *to the waist*.
They stripped him *to the skin*.
They stripped him *to the buff*.

strip, undress

He stripped *to his shirt*.
He stripped *to his vest*.
He stripped *to the waist*.
He stripped *to the skin*.
He stripped *to the buff*.

EXERCISE I RESTATE in the passive
voice past, present and
future.

EXERCISE I CHANGE to: *He was
standing in the rain
stripped to his shirt.*

2 CHANGE to: *He was
caught and stripped to
his shirt.*

4 freeze, chill, cut

The wind froze them *to the bone*.
The wind froze them *to the marrow*.

5 cut, sting, touch

The refusal cut him *to the quick*.
The rebuff cut him *to the heart*.

cut, sting

The refusal cut *to the quick*.
The rebuff cut *to the heart*.

EXERCISE I RESTATE in the passive
voice with all nomi-
nated verbs in three
tenses.

EXERCISE I SUBSTITUTE *stung* for
cut.

6 fan

The wind fanned the spark, the embers *to a flame*.

7 degree (*general*)

ABSTRACT

I'm exerting my strength *to the full*.
We will help you *to the utmost*.

We will exert our influence *to the uttermost*.
They exploited the situation *to the maximum*.
They will support you *to the hilt*.

EXERCISE 1 TREAT as a substitution table except the final phrase of the last example.

2 REPEAT in the passive voice past, present and future.

8

I'm telling the truth *to the best of my ability*.

I'm describing the facts *to the best of my belief*.

I'm making this statement *to the best of my knowledge and belief*.

EXERCISE 1 SUPPLY twenty sentences to end with *to the best of my ability* e.g.
I'm drawing circles to...

He's studying *to the best of his ability*.

He's reporting *to the best of his belief*.

He's speaking *to the best of his knowledge and belief*.

EXERCISE 1 MAKE UP ten similar sentences with different verbs.

9 put

This is putting me *to considerable trouble*.

This is putting me *to considerable effort*.

This is putting me *to considerable inconvenience*.

This is putting me *to considerable expense*.

EXERCISE 1 SUBSTITUTE *no end of* for *considerable* throughout.

2 RESTATE in the passive voice past and future.

go

I'm going *to considerable trouble* on your account.

I'm going *to considerable effort* on your behalf.

I'm going *to considerable inconvenience* on your account.

I'm going *to considerable expense* on your behalf.

EXERCISE 1 SUBSTITUTE *no end of* for *considerable*.

2 REPEAT in the present perfect and past perfect tenses.

10 copy, plan, imitate

I'm copying them *to the last detail*.

I'm copying them *to the smallest detail*.

I'm copying them *to the letter*.

I'm copying them *to the smallest particular*.

agree, coincide

They agree *to the last detail*.

They agree *to the smallest detail*.

They agree *to the letter*.

They agree *to the smallest particular*.

(eat) (drink) consume, enjoy
They ate it *to the last mouthful*.
They ate it *to the last crumb*.
They drank it *to the last mouthful*.
They drank it *to the last drop*.

EXERCISE 1 SUBSTITUTE *consume*
and *enjoy* for *eat* or
drink.

2 REPEAT in the passive
voice past perfect and
present perfect tenses
all suitable verbs.

11 fight

They fought the enemy *to the last*
man.

They fought the attackers *to the*
last round.

They fought their positions *to the*
last ditch.

They fought their ships *to the last*
moment.

They fought their guns *to the last*.

They fought the invader *to the*
death.

EXERCISE 1 INSERT *very* before *last*
in both patterns.

12 break, smash, crush, tear,
blow, dash, shake, pick, cut,
chop, kick

I'm breaking it *to pieces*.

I'm breaking it *to bits*.

disappear

It disappeared *to the last mouthful*.

It disappeared *to the last crumb*.

It disappeared *to the last mouthful*.

It disappeared *to the last drop*.

EXERCISE 1 USE the adverbial
phrase with adjectives
e.g. *palatable*,
refreshing.

fight, battle, endure

They fought *to the last man*.

They fought *to the last round*.

They fought *to the last ditch*.

They fought *to the last moment*.

They fought *to the last*.

They fought *to the last breath*.

They fought *to the death*.

EXERCISE 1 SUBSTITUTE the verbs
nominated for *fight*.

2 ADD the phrase begin-
ning with *to ... to the*
sentence: *We are with*
you ...

break, smash, crush, blow,
shake, dash, go

It breaks *to pieces*.

It breaks *to bits*.

I'm breaking it *to fragments*.
I'm breaking it *to atoms*.

- EXERCISE 1 SUBSTITUTE all verbs nominated in place of *break* in the present continuous and simple past tenses.
- 2 RESTATE with all verbs in the passive voice in three tenses.

13 tear, blow, cut, pick
I'm tearing it *to pieces*.
I'm tearing it *to bits*.
I'm tearing it *to shreds*.
I'm tearing it *to ribbons*.
I'm tearing it *to rags*.
I'm tearing it *to tatters*.
I'm tearing it *to scraps*.
I'm tearing it *to atoms*.

- EXERCISE 1 REPLACE *tear* by the nominated verbs in the present continuous and simple past tenses.
- 2 RESTATE orally with all verbs in the passive voice e.g. *It'll be torn...*
It'd been torn ...

14 take
I'm taking it *to pieces*.
I'm taking it *to bits*.
= I'm taking it apart.

It breaks *to fragments*.
It breaks *to atoms*.

- EXERCISE 1 SUBSTITUTE all verbs nominated in place of *break* in the simple past and present perfect tenses in the interrogative form.

tear, blow
It tears *to pieces*.
It tears *to bits*.
It tears *to shreds*.
It tears *to ribbons*.
It tears *to rags*.

It tears *to scraps*.
It tears *to atoms*.

- EXERCISE 1 REPEAT using the improbable conditional:
If it tore to pieces, I'd have to get another.
- 2 REPEAT substituting a clause beginning with *until ...* for the adverbial phrase.

come, fall
It comes *to pieces*.
It comes *to bits*.
= It comes apart.

Technical

15 widen, lengthen, shorten
They widened it *to 6 feet*.
They lengthened it *to 16 feet*.
They shortened it *to 60 feet*.

widen, lengthen, shorten
It widened *to 6 feet*.
It lengthened *to 16 feet*.
It shortened *to 60 feet*.

16 change, turn, cool, freeze,
heat, boil

We change it *to a gas*.

We changed it *to a vapour*.

We changed it *to a liquid*.

We changed it *to a solid*.

We changed it *to a semi-liquid*.

EXERCISE I SUBSTITUTE all nominated verbs for *change* in both structures where applicable.

- 2 RESTATE in the passive voice with all verbs in the past perfect and improbable conditional with four verbs.

17 beat, crush, grind, squeeze

We beat it *to a powder*.

We beat it *to a pulp*.

18 beat, mix, whip, stir, boil,
thicken, evaporate, thin,
dilute

We beat it *to a paste*.

We beat it *to a cream*.

We beat it *to a gruel*.

We beat it *to a jelly*.

We beat it *to an emulsion*.

EXERCISE I SUBSTITUTE all nominated verbs for *beat* in the simple past and past continuous tenses.

- 2 RESTATE in the passive voice in any three tenses.

- 3 REPEAT both structures inserting *thin* and *thick* before the final noun.

change, turn, cool, freeze,
heat, boil

It changed *to a gas*.

It changed *to a vapour*.

It changed *to a liquid*.

It changed *to a solid*.

It changed *to a semi-liquid*.

EXERCISE I REPEAT with suitable verbs in the present continuous and present perfect tenses.

go, crush, grind, squeeze

It went *to a powder*.

It went *to a pulp*.

beat, mix, whip, stir, boil,
thicken, evaporate, thin,
dilute

It went *to a paste*.

It went *to a cream*.

It went *to a gruel*.

It went *to a jelly*.

It went *to an emulsion*.

EXERCISE I REPEAT with all nominated verbs in place of *go* in the simple past and future tenses.

- 2 REPEAT both structures changing the final phrase to *to the consistency of a thin paste*.

19 do, fit, adjust, gauge, measure, judge

I'm fitting it *to a fine margin*.

I'm fitting it *to fine tolerances*.

I'm fitting it *to the thickness of a fingernail*.

I'm fitting it *to a hair's breadth*.

I'm fitting it *to the breadth of a finger*.

I'm fitting it *to a nicety*.

EXERCISE I SUBSTITUTE all nominated verbs for *fit*.

2 RESTATE in the passive voice present and simple past tenses with all verbs.

fit, adjust, gauge, measure, work

It gauges *to a fine margin*.

It gauges *to fine tolerances*.

It gauges *to the thickness of a fingernail*.

It gauges *to a hair's breadth*.

It gauges *to the breadth of a finger*.

It gauges *to a nicety*.

EXERCISE I SUBSTITUTE all nominated verbs for *gauge*.

20 calculate, measure, estimate

They calculated the answer *to 3 places of decimals*.

They calculated needs *to the nearest inch*.

They calculated requirements *to the nearest yard*.

They calculated them *to the nearest pound*.

They calculated them *to the nearest milligram*.

They calculated them *to the nearest thousandth of a second*.

EXERCISE I SUBSTITUTE *a (an)* for *nearest*.

2 SUBSTITUTE *measure* and *estimate* for *calculate*.

21 lighten, darken, change

They changed the paint *to this colour*.

They lightened the paint *to this shade*.

They darkened the paint *to this tint*.

22 inflate, deflate

He inflated the balloon *to twice its usual size*.

He deflated the balloon *to half its normal size*.

lighten, darken, change

The paint changed *to this colour*.

The paint lightened *to this shade*.

The paint darkened *to this tint*.

expand, shrink

The balloon expands *to twice its usual size*.

The balloon shrank *to half its normal size*.

23 take, carry, transmit, go, pass
transfer

The pipes carry the gas *to the stove*. The gas goes *to the stove*.

The pipes carry the liquid *to the refinery*. The liquid goes *to the refinery*.

The wires carry the current *to the cylinders*. The current goes *to the cylinders*.

The piston carries the movement *to the shaft*. The movement goes *to the shaft*.

24 take, carry, follow

They carried the reasoning *to its conclusion*.

They carried the principle *to its logical conclusion*.

lead

The reasoning led *to this conclusion*.

The principle led *to its logical conclusion*.

25 take, carry, push

They carried the matter *to great lengths*.

They carried the matter *to such lengths* that ...

They carried the principle *to absurd lengths*.

They carried the reasoning *to the point of absurdity*.

They carried the joke *to extremes*.

go

They went *to great lengths*.

They went *to such lengths* that ...

They went *to absurd lengths*.

They went *to the point of absurdity*.

They went *to extremes*.

EXERCISE I REPEAT as a substitution table using all nominated verbs.

2 RESTATE in the passive voice past, present and future.

EXERCISE I ADD *to prove that ...* and complete the sentence.

2 MAKE UP sentences beginning, *Having gone to great lengths they ...*

He carried the scar *to the grave*.

Mainly abstract destinations

1 send

They sent them *to a safe place*.

They sent them *to safety*.

go

They went *to a safe place*.

They went *to safety*.

They sent them *to their account*.
They sent them *to their death*.
They sent them *to their fathers*.
They sent them *to Coventry* (prov.).
This sent them *to pot* (coll.).

They went *to their account*.
They went *to their death*.
They went *to their fathers*.
They went *to Coventry* (prov.).
They went *to pot* (coll.).
They went *to the pack* (coll.).

go, run
They go *to seed*.

run
They run *to fat*.
They run *to seed*.
They run *to buying jewellery*.
They run *to jewellery*.
They run *to words*.
They run *to prolixity*.
(He rides *to hounds*).

2 put

They put them *to flight*.

They put them *to death*.
They put them *to shame*.

They took *to flight*.
They took *to their heels*.
They went *to their death*.

3 take

They took him *to task*.
They took him *to court*.
They took him *to law*.
They took the matter *to arbitration*.

go

He went *to court*.
He went *to law*.
The matter went *to arbitration*.

EXERCISE I REPEAT in the passive
voice past and future.

4 drive, goad

This drove them *to action*.
They drove them *to exhaustion*.
They drove them *to the point of exhaustion*.
This drove him *to despair*.

They worked *to exhaustion*.
They worked *to the point of exhaustion*.

She drove him *to distraction*.
 This drove him *to madness*.
 They drove them *to their death*.
 They drove them *to suicide*.

EXERCISE I INSERT *to the point of* after *to*.

5 eat, drink, smoke
 They ate meat *to their satisfaction*.
 They drank beer *to their liking*.
 They smoked cigars *to repletion*.
 They ate meat *to satiety*.
 They drank beer *to excess*.

eat, drink, smoke
 They ate *to their satisfaction*.
 They drank *to their liking*.
 They smoked *to repletion*.
 They ate *to satiety*.
 They drank *to excess*.

EXERCISE I SUBSTITUTE *the point of* in place of *their* with both structures (omit first two on both sides).

6 do, copy, imitate
 They did it *to our satisfaction*.
 They did it *to our liking*.
 They did it *to the life*.
 They did it *to perfection*.
 They did it *to the manner born*.
 They did it *to death*. (*do only*).

copy, cook
 She cooks *to our satisfaction*.
 She cooks *to our liking*.

She cooks *to perfection*.
 (She cooks *to a cinder*.)

7 follow, send
 They followed him *to victory*.
 They followed him *to defeat*.
 They followed him *to their fate*.
 They followed him *to perdition*.
 They followed him *to death and dishonour*.
 They followed him *to oblivion*.
 They followed them *to annihilation*.

follow, go, rush, dash
 They followed *to victory*.
 They followed *to defeat*.
 They followed *to their fate*.
 They followed *to perdition*.
 They followed *to death and dishonour*.
 They followed *to oblivion*.
 They followed *to annihilation*.

EXERCISE I REPEAT substituting
send for *follow*.

EXERCISE I. SUBSTITUTE all nominated verbs for *follow*.

8 lead, force (first 3 only)
 These facts lead us *to the belief that ...*

lead
 The facts lead *to the belief that ...*

The evidence leads us *to the belief that ...*

The reasoning leads us *to this conclusion.*

These beliefs lead us *to our undoing.*

These mistakes lead us *to disaster.*

These mistakes lead us *to defeat.*

These decisions lead us *to victory.*

EXERCISE I RESTATE substituting
force for *lead*.

2 RESTATE in the passive
voice with both verbs
in the past and future
tenses.

The evidence leads *to the belief that ...*

The reasoning leads *to this conclusion.*

These beliefs lead *to our undoing.*

These mistakes lead *to disaster.*

These mistakes lead *to defeat.*

These decisions lead *to victory.*

EXERCISE I REPEAT in the past
perfect, present perfect
and future tenses.

9 applaud

They applauded him *to the echo.*

applaud

They applauded *to the echo.*

10 starve, beat, kick, stab,
hound

They starved him *to death.*

They burned him *to death.*

They kicked them *to death.*

They stabbed them *to death.*

They hounded them *to death.*

starve

He starved *to death.*

He burned *to death.*

He bled *to death.*

EXERCISE I RESTATE in the passive
voice perfect and past
perfect tenses.

11 crowd

This crowded them *to suffocation.*

crowd

They crowded *to suffocation.*

12 laugh, hold

They laughed him *to scorn.*

13 swear

They swore them *to silence.*

The conspirators swore them *to
secrecy.*

trust

They trusted *to luck.*

They trusted *to chance.*

C 'To' with adverbials of degree (cont.): with movement upwards

Mainly demonstrable

STRUCTURE ONE S. + V. + D.O. +
Adverbial with TO ...

PHYSICAL (DEMONSTRABLE)

1 raise, lift

I'm raising my arms *to their fullest extent*.

I'm raising my eyes *to the ceiling*.

2 raise (*himself*), help, lift

I'm helping him *to his knees*.

I'm lifting him *to his feet*.

He's raising himself *to his knees*.

He's raising himself *to his feet*.

3 fill, raise (*the level*)

I'm filling the glass *to the brim*.

I'm filling the beaker *to the top*.

I'm filling the cylinder *to capacity*.

I'm filling the container *to the level of the mark*.

I'm filling the flask *to overflowing*.

I'm filling it *to within an inch of the top*.

I'm filling it *to the required level*.

EXERCISE 1 REPEAT in the passive
voice past and future.

4 raise, lift (*with sound*)

I'm raising my voice *to a cry*.

I'm raising my voice *to a howl*.

STRUCTURE TWO S. + V. + Adverbial
with TO ...

rise, go

My arms are rising *to their fullest extent*.

My eyes went *to the ceiling*.

rise, stumble

He is rising *to his knees*.

He's stumbling *to his feet*.

He's staggering *to his knees*.

He's rising *to his feet*.

rise

The water rises *to the brim*.

The liquid rises *to the top*.

fill

The glass fills *to capacity*.

The beaker fills *to the level of the mark*.

The cylinder fills *to overflowing*.

The container fills *to within an inch of the top*.

The flask fills *to the required level*.

EXERCISE 1 REPEAT in the present
perfect tense.

rise (*with sound*)

My voice rises *to a cry*.

My voice rises *to a howl*.

I'm raising my voice *to a yell*.
She's raising her voice *to a scream*.
She's raising her voice *to a shriek*.
I'm raising my voice *to a bellow*.

EXERCISE 1 SUBSTITUTE one verb
in the simple past tense
for the verb and object
and objective comple-
ment: *I cried*.

- 2 REPEAT inserting *loud*,
shrill, *an agonising*
before the final noun.

My voice rises *to a yell*.
Her voice rises *to a scream*.
Her voice rises *to a shriek*.
My voice rises *to a bellow*.

EXERCISE 1 REPEAT in the simple
past tense.

rise

The fish rose *to the bait*.
He rose *to the occasion*.

rise

The noise rose *to a roar*.
The music rose *to a crescendo*.
The hiss rose *to a scream*.
The sound rose *to a shrill whistle*.
The whirr rose *to a thunderous roar*.
The rumble rose *to a loud drum-
ming*.

EXERCISE 1 REPEAT as a substitu-
tion table.

- 2 REPEAT on the pattern:
*The noise rose until it
was a roar*.

5 heat, bring

I'm heating the pin *to a red heat*.
I'm heating the water *to boiling-
point*.
I'm heating the metal *to 1000°C*.
Speed heats the metal *to in-
candescence*.

EXERCISE 1 SUBSTITUTE *bring* for
heat.

- 2 RECAST into the pat-
tern: *I'm raising the
temperature of the
pin ...*

heat, come

The pin heats *to a red heat*.
The water heats *to boiling-point*.

The metal heats *to 1000°C*.
The metal heats *to incandescence*.

EXERCISE 1 SUBSTITUTE *come* for
heat.

go

Praise goes *to his head*.

Success goes *to his head*.

6 blow ... up, inflate

I'm blowing the balloon up *to 30 p.s.i.*

I'm blowing the balloon up *to bursting-point*.

I'm blowing it up *to (a pressure of) 2 atmospheres*.

(*the pressure*) increase, rise

The pressure increases *to 30 p.s.i.*

The pressure increases *to bursting-point*.

The pressure increases *to 2 atmospheres*.

EXERCISE 1 SUBSTITUTE *inflate* for
blow ... up.

EXERCISE 1 CHANGE to: *I've increased the pressure to ...*

2 CHANGE to: *The pressure rises ...*

Mainly non-demonstrable

7 grow, cultivate

Farmers grow cane *to 12 feet (high)*.

Farmers grow cane *to a height of 12 feet*.

grow

Cane grows *to 12 feet (high)*.

Cane grows *to a height of 12 feet*.

8 raise, increase

Farmers raised the yield *to 20 tons an acre*.

Farmers raised the return *to 20 bushels an acre*.

The use of fertilizers raised the yield *to one cwt a tree*.

raise, increase

The yield rose *to 20 tons an acre*.

The return rose *to 20 bushels an acre*.

The yield rose *to one cwt a tree*.

9 raise, promote

They raised him *to headmaster*.

They raised him *to archbishop*.

They raised him *to admiral*.

They raised him *to marshal*.

rise

He rose *to headmaster*.

He rose *to archbishop*.

He rose *to admiral*.

He rose *to marshal*.

They raised him <i>to a position of power.</i>	He rose <i>to a position of power.</i>
They raised him <i>to a position of trust.</i>	He rose <i>to a position of trust.</i>
They raised them <i>to positions of responsibility.</i>	They rose <i>to positions of responsibility.</i>
They raised them <i>to positions of power and influence.</i>	They rose <i>to positions of power and influence.</i>

EXERCISE 1 SUBSTITUTE *promote* for *raise*.

2 RESTATE in the passive voice with both verbs in the past, present and future tense.

3 RECAST the vocabulary of exercise 2 into the pattern: *They made him headmaster.*

He rose *to fame.*
He rose *to riches.*
He rose *to fame and fortune.*
He rose *to power.*
He rose *to power and influence.*
He rose *to eminence.*

EXERCISE 1 SUBSTITUTE the names of ten positions with rise (omit article).

D 'To' with movement downwards

STRUCTURE ONE S. + V. + D.O. + Adverbial with (TO ...)

STRUCTURE TWO S. + V. + Adverbial with (TO ...)

PHYSICAL (DEMONSTRABLE)

1 drop, lower

I'm lowering the weight *to the table.*

I'm dropping the weight *to the floor.*

I'm dropping the weight *to the floor.*

I'm forcing the window *to the bottom.*

I'm dropping my eyes *to the floor.*

I'm lowering my hand *to this level.*

fall, drop, sink, go

It drops *to the table.*

It falls *to the floor.*

It drops *to the floor.*

The window goes *to the bottom.*

My eyes went *to the floor.*

My hand drops *to this level.*

2 drink, drain, empty, measure, use

I'm drinking the liquid *to the last mouthful.*

I'm draining the liquid *to the dregs.*

I'm emptying the liquid *to the lees*.
 I'm measuring the liquid *to the last drop*.
 I'm measuring the liquid *to the last cubic centimetre*.

EXERCISE 1 RESTATE using the passive infinitive: *The liquid must be drunk ...*

3 bring, force	fall, drop, sink
I'm bringing him <i>to his knees</i> .	He falls <i>to his knees</i> .

sound, voices

4 drop, lower	drop, fall, fade, sink, die, dwindle, subside, weaken
---------------	--

She's dropping her voice <i>to a whisper</i> .	Her voice dropped <i>to a whisper</i> .
--	---

She's lowering her voice <i>to an undertone</i> .	Her voice fell <i>to an undertone</i> .
---	---

Her voice faded *to a murmur*.

Her voice sank *to a sigh*.

Her voice died *to a sob*.

EXERCISE 1 SUBSTITUTE the final nouns in pattern 2 for those on the left.
 2 SUBSTITUTE all eight verbs in each sentence on the right.

5 reduce, cut, lower	fall, fade, sink, die, dwindle, subside
----------------------	--

This reduces the noise <i>to a minimum</i> .	The noise fell <i>to a minimum</i> .
--	--------------------------------------

This reduces the noises <i>to a rumble</i> .	The noises faded <i>to a rumble</i> .
--	---------------------------------------

This reduces the static <i>to a whistle</i> .	The static sank <i>to a whistle</i> .
---	---------------------------------------

This reduces the interference <i>to a murmur</i> .	The interference sank <i>to a murmur</i> .
--	--

This reduces the whine <i>to a scratch</i> .	The whine died <i>to a scratch</i> .
--	--------------------------------------

This reduces the shriek of escaping steam <i>to a whisper</i> .	The shriek of escaping steam dwindled <i>to a whisper</i> .
---	---

This reduces the interference <i>to zero</i> .	The interference fades <i>to zero</i> .
--	---

EXERCISE 1 SUBSTITUTE *cuts* and *lowers* for *reduces*.

2 SUBSTITUTE all six verbs in each sentence (pattern 2).

- 3 REPEAT in the passive voice, past, present, future (pattern 1).
 4 REPEAT in the present and past perfect tenses (both patterns).

flow of water

6 reduce, cut, lower

I'm reducing the flow *to a trickle*.
 I'm reducing the flow *to a dribble*.
 I'm reducing the flow *to a few drops*.

I'm reducing the flow *to a quarter of its previous volume*.
 I'm reducing the flow *to nought*.
 I'm reducing the flow *to nothing*.

- EXERCISE 1 SUBSTITUTE *cut* and *lower* for *reduce*.
 2 RESTATE in the passive voice, past, present and future.

shrink, dwindle, decrease, diminish

The flow shrinks *to a trickle*.
 The flow shrinks *to a dribble*.
 The flow shrinks *to a few drops*.

The flow shrinks *to a quarter of its previous volume*.
 The flow shrinks *to nought*.
 The flow shrinks *to nothing*.

- EXERCISE 1 SUBSTITUTE *dwindle* for *shrink* and restate in the past tense.
 2 RESTATE in the present continuous and present perfect tenses with all verbs.

light and fire

7 reduce, turn down, trim

He reduced the light *to a gleam*.
 He turned down the light *to a glimmer*.
 The blanket reduced the light of the torch *to a glint*.
 The gale reduced visibility *to two miles*.

8 reduce

The fire reduced the house *to embers*.
 The flames reduced the city *to ashes*.
 The conflagration reduced the houses *to cinders*.

fade, sink, die, dwindle

The light faded *to a glow*.
 The light sank *to a gleam*.
 The light died *to a spark*.
 Visibility dwindled *to (little more than) two miles*.

sink, die

The fire sank *to embers*.
 The flames sank *to ashes*.
 The conflagration died *to cinders*.

9 dig, deepen, excavate, bore
 They dug the hole *to five feet*.
 They dug the hole *to a depth of five feet*.
 They dug the hole *to bedrock*.

EXERCISE I USING all verbs repeat
 in the passive voice.

10 run
 They ran the fox *to earth*.
 They ran the fox *to ground*.
 They ran the fox *to cover*.

11 burn, shake, rock, raze
 The fire burned the house *to the foundations*.
 The fire burned the ship *to the waterline*.
 The earthquake shook the temples *to their foundations*.
 The shock rocked the buildings *to their foundations*.
 They razed them *to the ground*.
 This shook the party *to its foundations* (fig.).

EXERCISE I RESTATE in the passive
 voice, past, present
 and future.

12 reduce
 This reduced him *to a shadow*.
 This reduced him *to a shadow of his former self*.
 This reduced it *to a heap of scrap*.
 This reduced it *to waste*.
 This reduced the ship *to a wreck*.
 This reduced it *to scrap*.

go
 The hole goes *to five feet*.
 The hole goes *to a depth of five feet*.
 The hole goes *to bedrock*.

run, go
 The fox went *to earth*.
 The fox went *to ground*.
 The fox went *to cover*.

burn, shake, rock
 The house burned *to the foundations*.
 The ship burned *to the waterline*.
 The temples shook *to their foundations*.
 The buildings rocked *to their foundations*.

go
 It went *to a heap of scrap*.
 It went *to waste*.
 It went *to a wreck*.
 It went *to scrap*.

send

They sent the ship *to the bottom*.
They sent the ship *to Davy Jones' locker* (fig.).

13 reduce

The hurricane reduced the house *to matchwood*.

The earthquake reduced the city *to rubble*.

The tornado reduced the city *to ruins*.

The hurricane reduced the city *to a shambles*.

The fire reduced the city *to ashes*.

The conflagration reduced the city *to embers*.

The catastrophe reduced the city *to cinders*.

The disaster reduced the city *to a pile of rubble*.

reduce

The defeat reduced the army *to a rabble*.

The rout reduced the army *to a horde*.

This manoeuvre reduced the division *to a leaderless horde*.

EXERCISE I RESTATE in the passive,
present and future.

ABSTRACT

14 reduce, cut

This reduced the supply of the metal *to a trickle*.

This reduced metal supplies *to a dribble*.

go

The ship went *to the bottom*.

The ship went *to Davy Jones' locker* (fig.).

crumble, crumple, sink

The house crumbled *to matchwood*.

The city crumbled *to rubble*.

The city crumbled *to ruins*.

The city crumbled *to a shambles*.

The city crumbled *to ashes*.

The city crumbled *to embers*.

The city crumbled *to cinders*.

The city crumbled *to a pile of rubble*.

deteriorate, sink

The army deteriorated *to a rabble*.

The army deteriorated *to a horde*.

The division deteriorated *to a leaderless horde*.

fall, dwindle

The supply fell *to a trickle*.

Metal supplies fell *to a dribble*.

This reduced the trade <i>to a quarter of its previous volume.</i>	Trade fell <i>to a quarter of its previous volume.</i>
This reduced production <i>to nothing.</i>	Production fell <i>to nothing.</i>

EXERCISE 1 REPLACE *reduce* with *cut*.

2 RESTATE on the pattern: *The supply would be reduced to ...*

15 reduce

This reduced the process *to its essence.*
 This reduced the matter *to (its) essentials.*
 This reduced the proposition *to its simplest terms.*
 This reduced the affair *to its proper perspective.*
 This reduced the proposition *to absurdity.*
 This reduced the disorder *to manageable proportions.*

	resort (<i>adopt as a way out</i>)
This reduced her <i>to tears.</i>	She resorted <i>to tears</i> to effect her purpose.
This reduced them <i>to smiles.</i>	They resorted <i>to smiles</i> to cover their embarrassment.
This reduced them <i>to laughter.</i>	They resorted <i>to laughter</i> to cover their embarrassment.
This reduced them <i>to stratagems.</i>	They resorted <i>to a trick</i> to effect their purpose.
This reduced their remarks <i>to personalities.</i>	They resorted <i>to personalities.</i>

MATHS., PHYSICS, CHEMISTRY (TECHNICAL)

16 reduce

We reduced the expression <i>to a quadratic.</i>	reduce, change, fall, sink The expression reduced <i>to a quadratic.</i>
We reduced the equation <i>to its simplest form.</i>	The equation reduced <i>to its simplest form.</i>
We reduced the temperature <i>to zero.</i>	The temperature fell <i>to zero.</i>
We reduced the temperature of the gas <i>to condensation point.</i>	The temperature of the gas fell <i>to condensation point.</i>
We reduced the temperature of the vapour <i>to dewpoint.</i>	The temperature of the vapour fell <i>to dewpoint.</i>

We reduced the set of forces *to a single force*.

We reduced the flow velocity *to subsonic*.

EXERCISE I SUBSTITUTE other verbs such as *lower*, *cool*, *simplify* for *reduce* and restate in the passive voice.

17 reduce, change

This reduced the rock *to a powder*.

This reduced the wood *to (a) pulp*.

This reduced the stone *to atoms*.

This reduces the liquid *to a brine*.

This reduces the sulphate *to a sulphite*.

This reduces the ferric *to the ferrous compound*.

This reduces the phosphate *to the phosphite*.

This reduces the nitrate *to the nitrite*.

EXERCISE I PUT the entire series into the passive voice, e.g. *It had to be reduced to ...*

The set of forces reduced *to a single force*.

The flow velocity fell *to subsonic*.

EXERCISE I SUBSTITUTE *change* for *reduce* and *sink* for *fall*.

turn, change, reduce, go

The rock turns *to a powder*.

The wood turns *to a pulp*.

The stone turns *to atoms*.

The liquid turns *to a brine*.

The sulphate turns *to a sulphite*.

The ferric turns *to the ferrous compound*.

The phosphate turns *to the phosphite*.

The nitrate turns *to the nitrite*.

EXERCISE I SUBSTITUTE all nominated verbs for *turn*.

Commerce

18 reduce, cut, lower, depress, force

This reduced retail prices *to their minimum*.

This reduced profit *to minimum*.

This reduced costs *to a minimum*.

This reduced insurance rates *to manageable proportions*.

This reduced prices *to an unprofitable level*.

fall, sink (topple, tumble, crumble, dive *stylistic*)

Prices fell *to their minimum*.

Profit fell *to a minimum*.

Costs fell *to a minimum*.

Insurance rates fell *to manageable proportions*.

Prices fell *to an unprofitable level*.

This reduced interest rates *to their minimum for five years.*

This reduced demand *to a point where it approximated supply.*

EXERCISE I SUBSTITUTE all other verbs for *reduce*.

2 RESTATE in the passive voice past, present and future.

Interest rates fell *to their minimum for five years.*

Demand fell *to the point where it approximated supply.*

EXERCISE I SUBSTITUTE other verbs nominated for *fall*.

2 RESTATE with a final clause *until they reached their minimum.*

stylistic variant

This reduces the mechanic *to the status of a hen in a battery.*

The mechanic sinks *to the status of a hen in a battery.*

19 reduce

He reduced the mess *to order.*

He reduced the process *to a formula.*

He reduced the procedure *to a routine.*

They reduced the business *to a drill.*

EXERCISE I RESTATE in the passive voice, present perfect and present continuous tenses.

reduce

The mess reduces *to order.*

The process reduces *to a formula.*

The procedure reduces *to a routine.*

The business reduces *to a drill.*

EXERCISE I RESTATE in the future tense.

Miscellaneous

20 reduce

This reduced them *to lethargy.*

This reduced them *to inactivity.*

This reduced them *to immobility.*

This reduced them *to paganism.*

This reduced them *to barbarism.*

This reduced them *to bankruptcy.*

This reduced them *to poverty.*

This reduced them *to beggary.*

This reduced them *to dire straits.*

sink into

They sank *into lethargy.*

They sank *into inactivity.*

They sank *into immobility.*

They sank *into paganism.*

They sank *into barbarism.*

They sank *into bankruptcy.*

They sank *into poverty.*

They sank *into beggary.*

They sank *into dire straits.*

This reduced them *to a state of permanent semi-starvation.*

They sank *into a state of permanent semi-starvation.*

EXERCISE I RESTATE in the passive voice, present perfect and future tense.

21 reduce

Fear reduced him *to a jelly.*

This reduced them *to speechlessness.*

This reduced them *to impotence.*

This reduced them *to a shadow (of their former selves).*

This reduced them *to a cypher.*

EXERCISE I RESTATE in the passive voice, plus perfect and perfect tenses.

E 'To' making adverbial indicating destination (hold this to that)

STRUCTURE ONE S. + V. + D.O. +
'TO' adverbial

STRUCTURE TWO S. + V. + 'TO'
adverbial

PHYSICAL—DEMONSTRABLE

1 stick, fix, fasten, glue, affix;
attach

I'm sticking the notice *to the door.*

I'm sticking the stamp *to the envelope.*

I'm sticking the label *to the bottle.*

I'm sticking the tag *to the case.*

I'm sticking the price tag *to the tin.*

stick, adhere

The notice sticks *to the door.*

The stamp sticks *to the envelope.*

The label sticks *to the bottle.*

The tag sticks *to the case.*

The price tag sticks *to the tin.*

EXERCISE I REPEAT with all nominated verbs.

2 REPEAT in the passive voice past, present and future with four verbs.

EXERCISE I REPEAT in present continuous tense. How does this change the meaning?

(Cobbler, stick *to your last* (prov.).)

2 hold, keep

I'm holding the paper *to the wall*.

I'm holding the paper *to the light*.

I'm holding one hand *to the other*.

I'm holding the end *to the join*.

I'm holding the motor-car *to the road*.

The motor-car holds *to the road*.

EXERCISE I REPEAT with *keep*.

3 tie, strap, nail, screw, bolt, join, rivet, weld

I'm tying this *to that*.

I'm tying the bracket *to the wall*.

I'm tying this plate *to that plate*.

tie, strap, nail, screw, bolt, join, rivet, weld

It ties *to that*.

The bracket ties *to the wall*.

This plate ties *to that plate*.

EXERCISE I REPEAT with all other verbs given.

4 put, apply

I'm putting the paint *to the surface*.

I'm putting the brush *to the surface*.

I'm putting the glue *to the paper*.

(Put your hand *to the plough* (prov.).)

stick, adhere, keep

The paint adheres *to the surface*.

The brush adheres *to the surface*.

The glue adheres *to the paper*.

EXERCISE I REPEAT with *apply* in the passive voice past, present and future.

5 lay

They lay siege *to the city*.

(They lay claim *to a sense of humour*.)

6 put

They put the army *to flight*.

They put the city *to the torch*.

They put the survivors *to the sword*.

They put the prisoners *to the torture*.

take

The army took *to flight*.

The army took *to its heels*.

They put the city *to the sack*.

EXERCISE I RESTATE in the passive voice past, present and future.

7 put

I'm putting the baby *to sleep*.

He put his hand *to his head*.

He put his hand *to his heart*.

67 go

We went *into the matter*.
We went *into the question*.
We went *into the subject*.
We went *into detail*.
We went *into details*.

This book is intended as a source of oral drill and practice material for use with classes or groups at all levels of instruction from intermediate to advanced, as much on the technical as on the arts side.

Because of the great number of meanings each common preposition carries, prepositions have earned a reputation for difficulty. This book seeks to bring progression and linguistic order to the multitude of meanings of six—*At, In, Of, On, To, and Into*. Each of these is dealt with in a separate section, in which the demonstrable and physical uses are presented first, followed by uses with abstract nouns and uses which are not demonstrable. The sections are themselves divided into numbered subsections, each giving a single meaning of the preposition with its associated nouns. So far as possible each prepositional phrase is presented as part of a simple short sentence and is thus used in the normal stress-tone pattern of the complete utterance.

Each subsection is followed by suggestions for oral drilling and written exercises.
